Issued by the
Economic and Statistical Adviser
Ministry of Food & Agriculture

PREFACE

This is the seventh issue of 'Agricultural Prices in India'. It describes the position of Agricultural Prices during 1956. It also gives statistical tables on different types of prices in respect of various agricultural commodities. The data have been collected from a variety of sources *e. g.* State Bulletins, Journals and Gazettes, Publications of other Ministries, F.A.O. etc. and do not possess the same degree of accuracy. The detailed work involved in the preparation of this publication has been done in the Agricultural Prices Branch of this Directorate.

S. R. SEN,
Economic and Statistical Adviser to the Government of India,
Ministry of Food and Agriculture.

INTRODUCTORY NOTE

The inflationary forces which had set in during the second half of 1955 gathered momentum during 1956. Wholesale prices rose almost uninterruptedly and the Economic Adviser's Index of all commodities which stood at 93·9 (Base: 1952-53=100) in December, 1955 attained a level of 107·9 during December, 1956. The increase in wholesale prices in India by 15 per cent over a period of 12 months was, however, not an isolated phenomenon; a similar spurt was witnessed in almost all the countries of Western Europe.

The rise in prices was particularly marked in two groups "Food Articles and Industrial Raw Materials". The index of food articles went up by 22 per cent from 87·5 in December to 106·9 in November, 1956; in December, 1956, the index declined slightly to 104·8. The index of industrial raw materials rose by 17 per cent from 102·2 in December, 1955 to 119·4 in December, 1956.

The sharp rise in prices of food articles and industrial raw materials and the relatively less marked rise in the prices of manufactures, liquor and tobacco and fuel, power, light and lubricants were ascribed essentially to monetary and other general factors which manifested themselves on the demand side. The tempo of investment in both the public and private sectors had been increasing for some years. The planned investment went up gradually from Rs. 343 crores in 1953-54 to Rs. 667 crores in 1956-57. Much of the increase in investment in the public sector was achieved through deficit financing. The volume of bank credit also increased from a level of Rs. 494 crores at the end of 1953-54 to Rs. 782 crores at the end of 1956-57. The money supply which was influenced largely by deficit financing and credit expansion also went up from Rs. 1,794 crores on 31st March, 1954 to Rs. 2,184 crores on 31st March, 1956. These monetary factors stimulated demand and a general uptrend in the price level.

Besides monetary factors, certain other specific factors also affected the demand for foodgrains and other agricultural commodities. Among these are: (*a*) a steady increase in the purchasing power of the public and high income elasticity of demand for foodgrains, (*b*) increasing tempo of urbanisation, (*c*) shifts in the distribution of national income, (*d*) increase in demand from abroad for certain exportable commodities, *e.g.*, vegetable oils and (*e*) increase in domestic demand for certain raw materials for industrial purposes. As a result, the consumption of foodgrains, and also of sugar, vanaspati, vegetable oils, cotton, milk, ghee, etc. increased. Not only was actual consumption reported to be higher, but the traders also began to build up stocks in anticipation of a rise in prices.

While the demand tended to increase, the supply of foodgrains and certain other agricultural commodities fell short of the previous year's level. The short-fall in production was particularly noticeable in respect of coarse cereals, oilseeds, cotton and chillies. Not only was the production lower than the previous year, but also market arrivals, particularly of foodgrains, slowed down in the year pushing up the prices sharply.

Thus the rise in prices during 1956 was the consequence of the changes in demand affected by general inflationary pressures and other factors operating specifically on the demand for foodgrains and other agricultural commodities on the one hand and changes in the supply situation of individual crops on the other.

Foodgrains—The upward tendency in the prices of foodgrains which had started in the middle of 1955 continued almost uninterruptedly during 1955-56. The Economic Adviser's Index of Wholesale Prices for cereals which had risen from 67 in May, 1955 to 77 in December, 1955 rose further thereafter and reached the level of 97 in December, 1956. Similarly, the index of wholesale prices of pulses reached a level of 87 in December, 1956 compared to 73 in December, 1955 and 48 in May, 1955. The persistence of the rise in the prices of cereals and pulses even after the arrival of the new kharif crop in the market was mainly due to the short-fall in the production of foodgrains, especially of coarse grains. The production of foodgrains in 1955-56 amounted to 65·3 million tons as against 66·6 million tons in 1954-55, thereby showing a fall of 1·3 million tons. Actually, the production of rice increased by 2·3 million tons, but there was a decline of 3·6 million tons in the production of wheat and coarse grains. The fall in the production of millets was to the tune of 3·4 million tons and it was this fall which was mainly responsible for the uptrend in prices. As a result of decreased production of millets, there was increased pressure of demand on both rice and wheat. Apart from the short-fall in production, unhealthy speculative activities of the trade and hoarding of stocks by traders and producers also contributed, in no small measure, to the rising trend.

Throughout the year, the Government kept a close watch over the price trend and took various measures to arrest any steep rise in prices. These measures included: (*i*) re-imposition of ban on the export of foodgrains; (*ii*) stepping up of import programme by entering into long-term agreements with some foreign countries; (*iii*) sale of rice and wheat at reasonable prices through a net-work of fair price shops; (*iv*) imposition of restrictions on bank advances against stocks of foodgrains; and (*v*) imposition of restrictions on movement of wheat from and to the cities of Delhi, Calcutta and Greater Bombay. All these efforts coupled with the arrival of the new kharif crop had some soothing effect over the foodgrains market at the end of 1956.

The trend of prices of individual commodities is discussed below:

Rice—The production of rice during 1955-56 amounted to 26·85 million tons as against 24·53 million tons in 1954-55, thereby showing a rise of 2·32 million tons. Inspite of greater production of rice, the year 1956, witnessed an upward trend due to the higher pressure of demand on rice resulting from steep fall in the production of coarse grains. The All-India Index of Wholesale Prices of rice rose from 77 in January, 1956 to 101 in September, 1956. With the arrival of the new crop, there was a recession towards the close of 1956 and the index of wholesale prices stood at 93 in December, 1956.

Prices of rice at individual markets also exhibited more or less the same trend, as the wholesale price index numbers. At Kakinada in Andhra Pradesh, prices rose from Rs. 14-12-0 per md. in December, 1955 to Rs. 21 per md. in December, 1956. At Patna in Bihar, the price of rice rose steadily from Rs. 15 per md. at the beginning of the year to Rs. 18 per md. in June; in the last quarter of the year, the prices fell to Rs. 17 per md. At Kanpur, in U.P., prices showed a more or less similar trend. At Tiruchirapalli in Madras, there was a sustained rise from Rs. 14-12-0 per md. in January to Rs. 23-8-0 per md. in December, 1956. At Calcutta, the prices were irregular and ranged between Rs. 15-12-0 per md. in January, 1956 and Rs. 20 per md. in August, 1956.

Millets and Maize—The upward trend noticed in the prices of millets and maize in the latter half of 1955 continued during 1956 also. This was largely due to the susbstantial fall in the production of coarse grains during 1955-56, namely of jowar by about 2·5 million tons and of bajra, maize and small millets by about one million tons.

During 1956 jowar index of wholesale prices rose from 71 in December, 1955 to 127 in December, 1956 and bajra index advanced gradually from 99 in December, 1955 to 133 in December, 1956. Between December, 1955 and December, 1956 jowar prices rose at Nandyal in Andhra by more than 100 percent from Rs. 7 per md. in December, 1955 to Rs. 15-6-0 per md. in December, 1956; at Bombay from Rs. 10-12-0 per md. to Rs. 16 per md.; at Nagpur in Madhya Pradesh from Rs. 9 per md. to Rs. 15-14-0 per md.; at Jhansi in U.P. from Rs. 10-10-0 per md. to Rs. 12-1-0 per md. In the same period, maize prices at Patna in Bihar advanced from Rs. 10 per md. to Rs. 12-4-0 per md. and at Bahraich in U.P. from Rs. 11-8-0 per md. to Rs. 12-12-0 per md. *Bajra* prices too revealed a rise from Rs. 11 per md to Rs. 13-14-0 per md. at Kanpur in U.P. and from Rs. 9 per md. to Rs. 15-8-0 per md. at Tiruchirapalli in Madras. In view of the rising trend in prices since the middle of 1955, exports of jowar and maize were banned in January, 1956.

Ragi—Ragi prices also went up during 1956 inspite of the higher production during 1955-56. The All-India index of wholesale prices stood at 97 in December, 1956 as against 57 in December, 1955. During the year, the prices advanced at Anantpur in Andhra Pradesh from Rs. 7-8-0 per md. to Rs. 12-12-0 per md.; at Bangalore in Mysore from Rs. 7-2-0 per md. to Rs. 10-8-0 per md.; and at Salem in Madras, from Rs. 8-2-0 per md. to Rs. 12-8-0 per md.

Wheat—Wheat production showed a slight reduction from the record level of 8·78 million tons in 1954-55 to 8·57 million tons in 1955-56. Due to the decreased production as well as the high pressure of demand on wheat, the upward trend in prices which had commenced in the middle of 1955 continued without any break during 1956, except for a seasonal fall in April and May. The All-India index of wholesale prices for wheat rose from 80 in December, 1955 to 85 in January, 1956, declined to 79 in April, 1956 and thereafter, rising gradually touched 94 in December, 1956. The prices at individual centres also revealed more or less the same trend. Thus, at Ludhiana in Punjab, the price rose from Rs. 14 per md. in January, 1956 to Rs. 15-8-0 per md. in March, 1956, fell to Rs. 13 per md. in April and finally in December stood at Rs. 16-8-0 per md. At Hapur in U.P., the price of fair average quality of wheat was Rs. 14-10-0 per md. in January, 1956, Rs. 13 per md. in April, 1956 and Rs. 15-13-0 per md. in December, 1956. At Sagaur in Madhya Pradesh, the price of medium (Sharbati) quality of wheat rose from Rs. 14-8-0 per md. in January, 1956 to Rs. 16-14-0 per md. in December, 1956 after having touched a low level of Rs. 13-8-0 per md. in March, 1956.

Barley—Barley prices showed more or less the same trend as wheat. The All-India index of wholesale prices rose from 74 in December, 1955 to 85 in March, 1956, fell to 76 in April, 1956 and rose thereafter to 108 by December, 1956. Prices at Amritsar rose from Rs. 9 per md. in December, 1955 to Rs. 10 per md. in February, 1956, fell to Rs. 8 per md. in May and rose again to Rs. 13 per md. in December, 1956. At Chandausi, the price of barley stood at Rs. 13 per md. in November, 1956 as against Rs. 9-4-0 per md. in December, 1955 and Rs. 8-12-0 per md. in April, 1956.

Gram—Production of gram in 1955-56 declined slightly to 5·33 million tons from 5·39 million tons in 1954-55. After ruling firm in the 1st three months of 1956, the prices of gram weakened during the period April-June, 1956. The ban on the exports of gram imposed in February, 1956 coupled with seasonal increase in its supply initiated this downward trend. But later on due to depleted stock in the market, the price began to rise again and price index went up from 63 in June to 77 in December, 1956. Prices at individual centres also showed a similar trend. Thus prices of gram rose at Amritsar in Punjab from Rs. 10 per md. in December, 1955 to Rs. 16 per md. in December, 1956. At Kanpur in U.P., gram prices stood at Rs. 14-6-0 per md. in December, 1956 as against Rs. 10-8-0 in April, 1956.

Sugar and Gur—The 1955-56 season (November to October) had a record production of 18·6 lakh tons of crystal sugar as against 15·9 lakh tons during 1954-55. The phenomenal increase in sugar production was attributed partly to larger sugarcane production made possible by a larger cropped area, improved manurial practices and increased irrigation and partly to a larger number of sugar factories coming into operation. The consumption of sugar during 1955-56 also reached the peak level of 19·4 lakh tons and was even higher than the seasons' production by 80 thousand tons. The gap between production and consumption was bridged by import of 60,000 tons of sugar from abroad and by utilisation of stocks carried over from the previous year. The supply and demand being more or less balanced, prices of sugar remained generally steady. The prices during the year ranged between Rs. 29-4-0 and Rs. 31-4-0 per md. at Kanpur, between Rs. 29-14-0 and Rs. 32-8-0 per md. at Amritsar, between Rs. 31-4-0 and Rs. 33-12-0 per md. at Bombay and between Rs. 31-8-0 and Rs. 33-2-0 per md. at Calcutta. The Economic Adviser's Index of Wholesale Prices of Sugar (Base: 1952-53=100) stood at 94 during December, 1956 as against 92 during December, 1955.

As in the earlier three years, there was no control over the prices, movement or distribution of sugar in 1955-56, except that 25 per cent of the production was required to be kept in reserve with the factories. But in view of the substantial increase in sugar production during 1955-56 season, the necessity to acquire the reserve stock did not arise and this entire quantity was released for free sale. The minimum price of sugarcane for supply to mills was fixed at the previous year's level of Rs. 1-7-0 per md. for gate deliveries and Rs. 1-5-0 per md. for sale at rail head centres. The question of linking the price with quality was under the consideration of Government.

The prices of gur showed firmed up tendency particularly in the second half of 1956. The index of wholesale prices went up from 88 in February, 1956 to 120 in November, 1956; in December, 1956, the index fell to 106. During the year, the prices of gur ranged between Rs. 11 per md. and Rs. 14-12-0 per md. at Muzaffarnagar, between Rs.12 per md. and Rs. 17 per md. at Calcutta and between Rs. 17 per md. and Rs. 21 per md. at Bombay.

Oilseeds and Vegetable Oils—The prices of oilseeds and edible oils registered marked advances (35 per cent in the case of oilseeds and 51 per cent in the case of edible oils) during 1956 under the impact of diminished output and smaller carry-over of stocks on the one hand and the rising tempo of internal and external demand on the other. Production of the five major oilseeds (groundnut, rape and mustard, sesamum, linseed and castor seed) amounted to 66·96 lakh tons in 1955-56 as against 62·42 lakh tons in the previous year. The inflationary pressures led to speculative building up of stocks and the higher incomes generated by the increased developmental activity resulted in increase in the internal demand. The rise in prices during 1956 was also due partly to the levy in the 1956-57 budget of an excise duty of 6 pies per pound on all non-essential vegetable oils produced by power-driven factories in excess of 120 tons and the levy of a surcharge of one anna in a rupee on the railway freight on all commodities including oilseeds and vegetable oils. To arrest the rise in prices, Government adopted a restrictive export policy for edible oils and oilseeds. In the case of groundnut oil, the period of shipment for the quota announced on 22nd October, 1955 was not extended beyond February, 1956 and no fresh quota was issued thereafter. Exports of mustard oil were banned from 15th May, 1956. In the case of sesamum seed and oil, the licensing period for quotas announced in December, 1955 was not extended beyond March, 1956. The export duty on castor oil was raised from Rs. 125 to Rs. 175 per ton on 11th April,

1956. On linseed oil, a fresh export duty of Rs. 250 per ton was imposed on 11th April, 1956. This duty was, however, abolished on 23rd September, 1956. A fresh export duty of Rs. 200 per ton was also levied on kardi seed oil and niger seed oil. All these measures had a sobering effect on the prices of oilseeds and vegetable oils and after August, 1956, the rise in prices was arrested to a large extent.

Copra and Coconut Oil—The prices of both coconut oil and copra rose during 1956. Coconut oil which was quoted at Rs. 52-10-0 per md. at Madras in January, 1956 advanced to Rs. 62-9-0 per md. in December, 1956 while at Bombay it rose from Rs. 52-12-0 per md. to Rs. 64-10-0 per md. in the same period. The rise in prices was particularly marked towards the closing months of the year. This movement was more or less in tune with the upward trend of prices noticed in the case of oilseeds and vegetable oils in general.

Groundnut and Groundnut Oil—The rising trend in the prices of groundnut and its oil witnessed in the latter half of 1955 continued during the first half of 1956. The important factors responsible for this trend were the short-fall in production of groundnuts by 2·66 lakh tons, increased demand by households and vanaspati mills, rise in prices in foreign markets, levy of excise duty on non-essential oils and surcharge on railway freight. The All-India Index of Wholesale Prices of groundnut kernel rose from 83 in December, 1955 to 116 in May, 1956 and that of oil rose from 77 to 106. The bold variety at Bombay touched the level of Rs. 26 per md. in May, 1956 as compared to Rs. 20 per md. in December, 1955. The price of groundnut oil at Bombay rose in the same period from Rs. 42-8-0 per md. to Rs. 54-10-0 per md. For some time in May, the groundnut market showed no marked variation either way. The timely rains in the upcountry regions in June led to some decline in the prices, but the fear of damage to the crop in Saurashtra and Gujerat pushed up the prices again to about the May level. Arrivals of the new crop forced down the prices of groundnuts to some extent in September & October, 1956. In November, the blocking of the Suez Canal and the consequent uneasy political situation led to larger inquiries from abroad. However, contrary to market expectations Government did not release any export quota despite a better harvest for the 1956-57 season. As a result, prices receded slightly. During December, the index of groundnut and also of oil was 105. The price of groundnut and the oil at Bombay came down to Rs. 22-11-0 per md. and Rs. 53-13-0 per md.

Mustard Seed and Mustard Oil—Of all the major oilseeds, rape and mustard were subject to the most marked bullish influences. Being an essential article of house-hold consumption for cooking and other purposes, rape and mustard oil experienced a sharp rise in demand derived from the increased purchasing power in the country. Production instead of catching up with the higher demand, suffered a heavy decline, of more than 20 per cent during 1955-56, the final estimate of the crop being 848,000 tons as against 1,019,000 tons in 1954-55. That being so, nothing stood in the way of a sharp and continuous advance in prices in both the oil and seed sections of the market for rape and mustard.

The rise in prices began particularly from the month of March, partly reflecting the imposition of the excise duty on oils and the levy of a surcharge on railway freight. The arrival of the new crop in the second quarter of the year and the imposition of a ban on export of mustard oil from 15th May, 1957 failed to influence market sentiment and generally the uptrend continued till the end of the year. Between December, 1955 and December, 1956, the prices of seed at Kanpur rose by about 60 per cent from Rs. 25 to Rs. 40 per maund and of oil by 88 per cent from Rs. 51-8-0 to Rs. 97 per maund. The index of prices of rapeseed rose from 111 to 185 and that of mustard oil from 111 to 198.

Sesamum—The sesamum market during the year was under the same influences as rape and mustard. Prices rose in the face of rising demand and reduced output. The announcement of an export quota of 5 thousand tons of Sesamum seed and 10 thousand tons of oil on 31st December, 1955 hardened the domestic market in January. But in the absence of encouraging over-seas enquiries the market eased in February. In March, prices moved up partly as a result of the levy of excise duty and surcharge on freight. In April, prices receded at some of the centres partly as a corrective to the excessive rise in March and partly due to the decision of the Government not to extend the licensing period for sesamum seed and oil exports beyond March, 1956. The seed section was particularly weak presumably due to the attempt by the crushers to shift the burden of excise duty on to the producer of seed. But in May, seed prices advanced on release of the final estimate for the 1955-56 crop showing a decline of about 22 per cent in out-put from 589 thousand tons in 1954-55 to 457 thousand tons. Thereafter, the market remained a play-ground of speculative elements. Prices moved up and down but the overall position was one of scarcity. The December, 1956 quotation for seasmum oil at Bombay was Rs. 73-8-0 per maund which was about 40 per cent higher than the December, 1955 price of Rs. 52-14-0 per maund. The Economic Adviser's Index of Wholesale Prices in December, 1956 was 38 per cent higher for seed and 50 per cent higher for oil than in the corresponding month of 1955.

Linseed—Prices of both linseed and linseed oil registered considerable advance during the first three months of the year in continuation of the marked rise at the end of 1955. The main factors responsible for this trend were increased enquiries from abroad, Government's decision in January, 1956 to continue the free licensing policy and the levy of excise duty and surcharge on railway freight. These months constitute the off-season for linseed; the seasonal factor was, therefore, also partly responsible for the uptrend. The price of oil at Bombay stood at Rs. 66-13-0 during March, 1956 as against Rs. 51-12-0 during December, 1955. The corresponding quotations for linseed were Rs. 26-9-0 and Rs. 21-10-0 per maund respectively. During the next four months, prices witnessed a set-back due to the imposition of an export duty of Rs. 250 per ton on linseed oil with effect from April 11, 1956, arrival of the new crop which was reported to be better than the previous year's crop by 32 thousand tons, and also better crop reports from the United States, Canada and Argentina At Bombay, the prices for linseed and linseed oil touched the low levels of Rs. 20-10-0 per maund and Rs. 44-12-0 per maund respectively in the month of June. During August, the market again firmed up partly as a result of resumption of forward trading in linseed on 20th July after an interval of 12 years, removal of the export duty on linseed oil from 22nd September, 1956 and continuation of the policy of free licensing. But the rise in the prices could not be sustained in December because of the blocking of the Suez Canal which affected exports from India. During December, the price was reported to be Rs. 23-11-0 for linseed and Rs. 54-6-0 for linseed oil.

Castor and Castor Oil—The castor market registered a marked advance in the prices of both seed and oil during the year under review. In the first part of the year, the market remained bouyant largely as a result of broadening of overseas demand, extension of free licensing policy in January for castor oil exports and the permission given to the Bombay Grain and Oilseeds Merchants Association to transact future trading with effect from 16th February, 1956. Neither the arrival of the new crop which was a shade better than the previous year's nor the increase in export duty by Rs. 50 per ton from 11th April, 1956 had an adverse effect on the price level. Between December, 1955 and May, 1956, the prices at Hyderabad moved from Rs. 13-15-0 to Rs. 18-14-0 per maund for seed and from Rs. 33-15-0 to Rs. 46-8-0 per maund for oil. The market ruled easy during June and July a

again firmed up in August. In the last quarter of the year, a sharp and violent upward movement in prices took place as a result of keen foreign demand generated by the apprehension of war, and the need to hold larger stocks against the delay in voyage around the Cape. Unsatisfactory progress of the crop in Brazil and inauguration of forward trading in castorseed at Hyderabad on 16th October, 1956 were other factors which contributed to the uptrend. The prices of castorseed and castor oil at Hyderabad stood at Rs. 24-15-0 per maund and Rs. 53-5-0 per maund respectively in December, 1956.

Cotton—In the early months of the 1955-56 cotton season beginning from September, 1955, the prices tended to advance sharply on reports of a large fall in crop outturn. At Bombay, the price of Jarilla MGF which was quoted at Rs. 68-3-10 per md. at the end of August, 1955 advanced to Rs. 84-11-2 per md. in December, 1955. To meet the situation created by this steep upward movement the Government of India suspended forward trading at Bombay with effect from 23rd December, 1955. The futures markets were reopened on 7th January, 1956, but had to be closed again with effect from the 25th January, 1956. As a result, the price of Jarilla MGF declined to Rs. 79-12-0 per md. in January, 1956. However, the under-tone of the market remained firm due to the general scarcity of staple cotton and the increased demand for cotton manufactures. The price advanced to Rs. 81-5-3 per md. in May, 1956.

On 18th June, 1956, futures trading in Cotton was again resumed under certain safeguards. Local scarcity of cotton stock in the Bombay market due to short arrivals again saw cotton values touching the peak level of Rs. 83-15-6 per md. in July, 1956. At this stage, the Government of India entered into two agreements, *viz.*, the U.S. Aid Agreement under PL 480 and the Indo-Burma-USA Tripartite Agreement for the import of American cotton. Measures were also taken to check the rise in the prices of cotton manufactures. This coupled with the good prospects of the 1956-57 season's crop eased the situation to some extent and the Jarilla MGF at Bombay came down to Rs. 73-15-9 per md. in October. There was again a rise in prices due to the Suez Canal crisis in November, but the situation was brought under control by the Government's decision to allow imports of U.S. cotton towards the end of November, 1956. The release of an export quota of 50 thousand bales of Bengal Desi and 150 thousand bales of other exportable staples of ⅞" and below announced on 2nd December, 1956 had no marked effect on the market.

The index of wholesale prices of cotton stood at 109 in December, 1956 as against 117 in May, 1956, 101 in January, 1956 and 92 in November, 1955.

Jute—The prices of raw jute displayed three distinct phases: an initial rise in January and February followed by a decline upto June and reversal of the trend again from July which continued upto the end of the year. At Calcutta, the wholesale prices of raw jute rose from Rs. 27/8/- per md. in December, 1955 to Rs. 30/- per md. in February, 1956. fell down again to Rs. 27/8/- per md. in June, 1956 and after that gradually rose to Rs. 35/- per md. by December, 1956. The index of wholesale prices of raw jute stood at 110, 127, 113 and 138 in thecorresponding months. The initial spurt in raw jute prices may be attributed to (*i*) increased burlap consumption in the USA followed by decisions of Indian Jute Mills Association to unseal 2½% of looms with effect from 9th January, 1956 and again 50% of looms with effect from 20th February, 1956 which resulted in higher mill demand for raw jute and (*ii*) Pakistan Jute Board's decision to increase the minimum export prices. But the bullish trend could not sustain for long since the foreign buyers reduced purchases in expectation of a fall in prices of jute goods and mills delayed buying of raw jute for some time. From July, the prices began to soar again due to depleted stocks of raw jute in the market owing to seasonal transport difficulties usually felt in Jute-growing areas. The Indian

Jute Mills Association's decision at the end of June to re-seal 2·5% of looms and the Suez Crisis accentuated this trend. Even this increase in the production of raw jute from 2·9 million bales (of 400 lbs. each) in 1954-55 to 4·2 million bales in 1955-56 could not prevent prices from rising.

Black Pepper—Due to growing competition from Indonesia and Sarawak, consequent upon increased production in these two countries, prices of black pepper were looking down since 1952. The year 1956 continued to exhibit this tendency. The price of garbled black pepper at Cochin was quoted at Rs. 67-5-0 per md. in December, 1956 as against Rs. 104-1-0 in December, 1955. The fall was more or less continuous throughout the year except for some firmness witnessed during June—September, 1956. The main factors responsible for the general decline in prices were lack of demand from foreign buyers and increased internal production.

Rubber—Rubber prices in India are fixed by the Government from time to time in consultation with the Rubber Prices Advisory Committee as laid down under Section 13(1) of the Rubber (Production and Marketing) Act, 1947. The price was fixed in September, 1955 at Rs. 155-12-0 per 100 lbs. (f.o.b.) Cochin for Group I with suitable differentials for other groups. This price was also in force during 1956. Formerly, the fixed price was Rs. 150 per 100 lbs. At Kottayam the price of rubber ruled at Rs. 155-5-3 per maund throughout the year 1956.

Wool—Prices in the beginning of the year 1956 witnessed an upward movement due mainly to seasonal demand. The prices of 'White Assorted' variety of wool at Bangalore rose from Rs. 61-11-0 per maund in October, 1955 to Rs. 97-11-3 per maund in January 1956. The high level reached in January was maintained more or less during the following five months. In the second half of 1956, the prices showed a decline and in December, 1956, the price at Bangalore was reported at Rs. 72 per maund. The All-India index of wholesale prices dropped by 6% during the course of the year (from 126 in January, 1956 to 118 in December, 1956).

Turmeric—Turmeric markets in India experienced a slump during the year 1956 under review. The average price of turmeric at Calcutta during 1956 was Rs. 43-4-0 per maund as against Rs. 74-2-0 per maund during 1955. There was a continuous decline in price over the year 1956. The price at Calcutta touched a low level of Rs. 26 in October, 1956 and gained only Rs. 3 by the end of the year. The All-India index of wholesale prices fell from 232 to 115 in the course of the year. The substantial increase in output to 156 thousand tons in 1955-56 as compared to 138 thousand tons in 1954-55 was mainly responsible for this slump in turmeric prices. It may be mentioned that the prices of turmeric at Calcutta had substantially risen during the period 1953—55. Thus the decline in prices of turmeric during 1956 was a counter-movement of the rise in prices during the period 1953-54.

Tea—The market for tea had an easy undertone at the beginning of the year under review. In the Calcutta auctions, the medium dust variety sold for internal consumption in February was quoted at Rs. 1-7-0 per lb., while the medium B.P. variety for exports was quoted at Rs. 1-6-6 per lb. The low level of prices prevailing at the beginning of the year 1956 may be attributed to restrictions imposed by the Government on the export of tea for London auctions, leading to accumulation of large stocks in Calcutta. There was some recovery in prices after the Government lifted the embargo on London auctions at the end of February, 1956, but soon after, the prices again depressed due to the expectation of a larger North Indian crop in 1956. The only redeeming feature of tea prices during this

period was that while the prices of common tea were ruling low the best Assam tea was selling between Rs. 3 and Rs. 4 per lb. In view of the low off-take of common tea, the plucking operations were brought to an early halt. The decision to restrict production by the manufacturers combined with political disturbances in the Middle East brought about a marked improvement in the general price level for common and medium teas during the last quarter of the year under review. During this part of the year, the prices of all varieties of tea not only improved appreciably but the fluctuations in their prices were also considerably narrowed down. The price of medium dust tea sold for internal consumption rose from Rs. 1-8-0 per lb. in June to Rs. 2-5-0 per lb. in October, but declined to Rs. 1-15-0 in December. Similarly, the price of medium B.P. rose from Rs. 1-9-6 in June to Rs. 2-8-0 in November and fell slightly to Rs. 2-7-0 in December.

The All-India Index of Wholesale Prices of tea declined from 144 in January, 1956 to 122 in May, 1956; thereafter the index improved and touched the peak level of 200 at the end of the year, 1956.

Coffee—During 1956, the prices of all grades of coffee fluctuated within narrow range. The prices of Native Flats at Coimbatore declined from Rs. 175-4-0 per cwt. in January to Rs. 152-12-0 per cwt. in April and thereafter rose steadily to touch Rs. 169-14-0 per cwt. in July, 1956. In August, the trend reversed and the prices at Coimbatore came down steadily to Rs. 156-3-0 in December. The All-India Index of wholesale prices of Coffee which stood at 85 in January declined to 78 in April, after reaching 83 in July, it again receded to 77 in December. The level obtained in December, 1956 was lower than that in December, 1955 by 7%.

Chillies—The prices of chillies were on the ascendant in the year 1956, due to the fall in production by about 8,000 tons. The price of chillies at Patna rose from Rs. 72 in March, 1956 to Rs. 115 in November, 1956 as against Rs. 50 in per maund December, 1955. At Calcutta too prices showed sharp rise. The All-India Index of Wholesale Prices of chillies increased by 56% from 111 in January, 1956 to 173 in December, 1956. With a view to keeping the internal prices of chillies in check, the Government of India did not release any quota for the export of chillies beyond the July—December, 1955. But obviously this did not have much effect on prices.

Tobacco—According to the Final Estimates, the production of tobacco during 1955-56 was 259 thousand tons as against 244 thousand tons during 1954-55. Mainly as a result of increased production, the prices of tobacco showed a declining tendency upto April. The Economic Adviser's Index of Wholesale Prices for tobacco which stood at 80 in January, 1956 fell to 78 in April. Afterwards, prices again rose slightly, which may be attributed to the significant improvement in the exports of unmanufactured tobacco from 85 million lbs. in 1954-55 to 89 million lbs. in 1955-56. The index of prices gradually rose from 78 in April to 86 at the end of the year. The trend over the different markets in the country was, however, not uniform.

Arecanuts—Prices of arecanuts showed a downward trend till March, afterwards they improved considerably. Towards the close of the year, markets became generally steady. The Index of Wholesale Prices ranged between 123 in January-February and 141 in October. The average for the year 1956 came to 134·6 as against 122·02 in 1955. The prices of arecanuts at Mangalore rose from Rs. 116-8-0 per md. in January, 1956 to Rs. 130-8-0 per md. in September. During December the price was Rs. 120 per md.

Shellac—Prices of shellac in 1956 ruled at a lower level than in 1955. The year 1956 opened with shellac (T.N.) prices at Rs. 138 per md. at Calcutta, as against Rs. 180 per md. a year ago. Prices showed a significant decline during the first four months of the year due mainly to reduced demand from U.S.A., good Bysakhi crop and the reports that the U.K. Govt. intended to dispose of their accumulated stocks of shellac. Prices of T.N. shellac reached its low level of Rs. 112 per md. during April. In the subsequent two months, prices improved to Rs. 130 per md. on encouraging demand from U.S.S.R. and reports that the U.K. Government's stocks would be released slowly. During the quarter July—September prices showed a declining tendency but with narrow fluctuations. In September, however, sales to U.K. were restricted owing to the acute shortage of cold storage, shipping space, and lack of interest evinced by U.S. buyers who had been purchasing Siamese seedlac at considerable discount over Calcutta prices. Further the Katki Crop was reported to be good. These factors were mainly responsible for the decline in prices to Rs. 115 per md. at the end of November and Rs. 110 per md. at the close of 1956.

The above account of the price position during 1956 shows that the prices of food and agricultural products mostly exhibited an upward trend demanding constant vigilance and efforts to keep them under control. To augment internal supplies, exports were eithe restricted or completely prohibited and imports were arranged on a large scale. Besides other remedial measures were taken, such as stoppage of purchases by Govt., distribution of wheat and rice at below market rate, cardoning off of Calcutta, Delhi and Bombay in respect of wheat, etc. The targets of production of various agricultural commodities provided in the Second Five Year Plan were revised upwards. As a result of the various measures the pace of rise in prices tended to slow down towards the close of 1956. While prices of most of the agricultural products rose during the year, those of black pepper, turmeric, seedlac, tea and jute manufactures, important export products earning valuable foreign exchange, showed a decline.
